

PHARMA GRADE WAXES BY KOSTER KEUNEN

WAXES AVAILABLE

Beeswax White
Beeswax Yellow

FEATURES AND BENEFITS

- Used in numerous pharmaceutical formulations, particularly in semi-solid preparations like ointments, creams, soft gel capsules, and suppositories.
- Improve the appearance, stability, and swallowability of tablets, meeting the highest quality standards.
- Ensure smooth encapsulation and release of active ingredients in soft gelatin capsules, enhancing overall product efficacy.
- Serves as a stabilizer for keeping oil-based capsule contents in suspension and as a stabilizer and release agent in certain food supplements sold in tablet form.

APPLICATIONS

- **Controlled Release Tablets:** Achieve precise control over the release of active ingredients.
- **Nutraceuticals:** Enhance the quality and performance of nutraceutical products, ensuring maximum efficacy.
- **Pharmaceutical Excipients:** Ensure stability, consistency, and safety.
- **Pill & Tablet Glazing:** Provide a glossy, protective coating to pills and tablets, improve swallowability.
- **Topical:** Improve texture, stability, and skin feel, enhancing the overall effectiveness of the product.
- **Tablet Formulations:** Enhance the appearance, stability, and swallowability.
- **Soft Gel Capsules:** Ensure smooth encapsulation and release of active ingredients.
